RUBRICS: HSSC 1st ANNUAL EXAMINATION 2023
SUBJECT: CHEMISTRY HSSC-I (Local)

| Q.\# <br> /Part \# | Criteria | Level 1 (Marks) | Level 2(Marks) | Level 3 (Marks) | Level 4 (Marks) | Level 5 <br> (Marks) | Level 6 <br> (Marks) | Level 7 <br> (Marks) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2(i) | Calculate the mass of ammonia by $8 \mathrm{dm}^{3}$ of $\mathrm{H}_{2}$. | Writing correct calculation of mass of $\mathrm{NH}_{3}$ (RTP/STP) (3) | Partially correct calculation (2) | Some correct mathematical steps (1) | Wrong answer (0) |  |  |  |
| 2(ii) | Calculation of energy is required to remove an electron for $\mathrm{Li}+2$ in J/atom and $\mathrm{KJ} /$ mole when $\mathrm{n}=1$. | Writing correct calculation in J/atom (1.5) | Partially Correct calculation in J/atom (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct calculation in KJ/mole (1.5) | Partially Correct calculation in $\mathrm{KJ} /$ mole (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
| 2(iii) | Disadvantages of valence bond theory. | Writing any three Correct disadvantages of valence bond theory (3) | Any two Correct disadvantages of valence bond theory (2) | Any one Correct disadvantage of valence bond theory (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |
| 2(iv) | Description of any two factors which affect the bond length with examples | Writing correct description of 1 st factor with example (1.5) | Correct description of $1^{\text {st }}$ factor without example (1) | Partially Correct description of $1^{\text {st }}$ factor or only example (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct description of 2nd factor with example (1.5) | Correct description of $2^{\text {nd }}$ factor without example (1) | Partially Correct description of $2^{\text {nd }}$ factor or only example (0.5) | Wrong answer (0) |  |  |  |
| $2(v)$ | Describe the geometry of the given molecules on the basis of VSEPR theory <br> a. $\mathrm{SO}_{3}$ <br> b. $\mathrm{PCl}_{3}$ | Writing correct description with diagram of $\mathrm{SO}_{3}$ (1.5) | Partially correct response i.e either correct description or d (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct description with diagram of $\mathrm{PCl}_{3}(1.5)$ | Partially correct response (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
| $2(v i)$ | Definition/Description of isobar and Drawing the isobar at 1 atm and its description on its position with the increase in pressure | Writing correct description of isobar(1) | Partially correct response (0.5) | Wrong answer (0) |  |  |  |  |
|  |  | Drawing the correct graph of isobar (1) | Drawing the partially correct graph of isobar (0.5) | Wrong answer (0) |  |  |  |  |
|  |  | Writing correct description/graph at | Partially Correct description/graph at | Wrong answer (0) |  |  |  |  |

| Q.\# /Part \# | Criteria | Level 1 (Marks) | Level 2(Marks) | Level 3 (Marks) | Level 4 (Marks) | Level 5 <br> (Marks) | Level 6 <br> (Marks) | Level 7 <br> (Marks) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | different pressures (1) | different pressure (0.5) |  |  |  |  |  |
| 2(vii) | Development of London dispersion forces in helium gas | Writing correct description for the development of London dispersion forces in He (diagram not required) (3) | Partially Correct description of London dispersion forces (2) | Some relevant information (1) | Wrong answer (0) |  |  |  |
| 2(viii) | Reasoning for strong London dispersion forces in given molecules | Writing correct reason of strong London dispersion force between Ar and Kr (1) | Partially Correct reason London dispersion force (0.5) | Wrong answer (0) |  |  |  |  |
|  |  | Writing correct reason of strong London dispersion forces between $\mathrm{Br}_{2}$ and $\mathrm{I}_{2}$ (1) | Partially Correct reason London dispersion force (0.5) | Wrong answer (0) |  |  |  |  |
|  |  | Writing correct reason of strong London dispersion force between $\mathrm{C}_{2} \mathrm{H}_{6}$ and $\mathrm{C}_{4} \mathrm{H}_{10}$ (1) | Partially Correct reason London dispersion force (0.5) | Wrong answer (0) |  |  |  |  |
| 2(ix) | Role of hydrogen bonding in <br> a. Cleansing action of soap <br> b. Structure of DNA and protein molecules | Writing correct role of hydrogen bonding in Cleansing action of soap (1.5) | Partially Correct explanation role of hydrogen bonding (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct role of hydrogen bonding in Structure of DNA and protein (diagram not required) (1.5) | Partially Correct explanation role of hydrogen bonding (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
| $2(x)$ | Description of transition temperature by two examples | Writing correct description of transition temperature (2) | Partially correct description (01) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing any two correct examples of transition temperature (1) | Any one correct example of transition temperature (0.5) | Wrong answer (0) |  |  |  |  |
| 2(xi) | Differentiation between | Writing any three correct | Writing any two correct | Any one correct | Wrong answer |  |  |  |

| Q.\# /Part \# | Criteria | Level 1 (Marks) | Level 2(Marks) | Level 3 (Marks) | Level 4 (Marks) | Level 5 <br> (Marks) | Level 6 <br> (Marks) | Level 7 <br> (Marks) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Hexagonal close packing and cubic close packing in the structure of metals | differentiations (3) | differentiations (2) | differentiation (1) | (0) |  |  |  |
| $2(x i i)$ | Description/Definition of precipitation reaction and prediction of precipitate of $\mathrm{CaF}_{2}$ | Writing correct description of precipitation reaction (2) | Partially Correct description/Definition of precipitation (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct condition for the precipitation in $\mathrm{CaF}_{2}$ (1) | Wrong answer (0) |  |  |  |  |  |
| 2(xiii) | Acetic acid/ sodium acetate buffer action by the addition of NaOH | Writing correct description of buffer solution resistance/Buffer action after the addition of NaOH (3) | Partially Correct description of buffer solution resistance/Buffer action after the addition of NaOH (2) | Some relevant information (1) | Wrong answer (0) |  |  |  |
| 2(xiv) | Decrease of vapor pressure of the solvent by the addition of non-volatile nonelectrolyte solute | Writing correct description of decrease in vapor pressure of the solvent by the addition of non-volatile non-electrolyte solute (3) | Partially correct response (2) | Some relevant information (1) | Wrong answer (0) |  |  |  |
| $2(x v)$ | Description of reverse osmosis with one application | Writing correct description of reverse osmosis (2) | Partially Correct description of reverse osmosis (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing any one correct application (1) | Partially correct (0.5) | Wrong answer (0) |  |  |  |  |
| 2(xvi) | Calculating the mass of $\mathrm{O}_{3}$ in per kg of air | Writing correct calculation of mass of $\mathrm{O}_{3} / \mathrm{kg}$ of air (3) | Partially correct calculation of mass of $\mathrm{O}_{3} / \mathrm{kg}$ of air (2) | Some relevant calculation (1) | Wrong answer (0) |  |  |  |
| 2(xvii) | Calculating the $\Delta \mathrm{H}$ for the given reaction | Writing correct calculation of $\Delta H(3)$ | Partially Correct calculation of $\Delta \mathrm{H}(2)$ | Some relevant calculation (1) | Wrong answer (0) |  |  |  |
| 2(xviii) | Calculating the heat of combustion of glucose when 1.8 g of glucose is burnt. | Writing correct calculation of heat of combustion (3) | Partially Correct calculation of heat of combustion (2) | Some relevant calculation (1) | Wrong answer (0) |  |  |  |
| 2(xix) | Predicting the $\mathrm{E}^{0}$ of Zn -Ni cell and writing this cell reactions | Writing correct prediction of $\mathrm{E}^{0}$ cell (2) | Partially correct (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct reactions at | Correct reaction either at | Wrong answer (0) |  |  |  |  |

| Q.\# /Part \# | Criteria | Level 1 (Marks) | Level 2(Marks) | Level 3 (Marks) | Level 4 (Marks) | Level 5 <br> (Marks) | Level 6 (Marks) | Level 7 <br> (Marks) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | cathode and anode OR complete redox reaction in one step (1) | cathode OR anode (0.5) |  |  |  |  |  |
| 2(xx) | Balancing of given equation by ion electron method | Correct balancing by logically correct steps (3) | Partially correct balancing (2) | Some relevant information (01) | Wrong answer (0) |  |  |  |
| 3(a) | Calculation of volume of $\mathrm{H}_{2}$ gas and determination of mass of non-limiting reactant | Writing correct calculation (correct procedure with any atomic mass of Zn ) of volume of $\mathrm{H}_{2}$ gas by calculating limiting reactant by any method (3) | Partially Correct calculation (2) | Some relevant information/calculation (1) | Wrong answer (0) |  |  |  |
|  |  | Writing correct calculation of amount of excess reactant (3) | Partially Correct calculation (2) | Some relevant information/calculation <br> (1) | Wrong answer (0) |  |  |  |
| 3(b) | Derivation of $\Delta \mathrm{E}$ when electron drop from $n_{2}$ to $n_{1}$ in He ${ }^{+}$and calculation of $\Delta E$ when $n_{1}=1$ and $n_{2}=3$ for $\mathrm{He}^{+}$ | Writing correct derivation of $\Delta E$ in five streps (starting from $\left.\Delta E=E_{2}-E_{1}\right)(5)$ | Derivation involving any four correct steps (4) | Derivation involving any three correct steps (3) | Derivation involving any two correct steps (2) | Any one step is correct (1) | Wrong answer (0) |  |
|  |  | Writing correct calculation of $\Delta E$ (2) | Partially correct calculation of $\Delta \mathrm{E}$ | Any relevant calculation (0.5) | Wrong answer (0)) |  |  |  |
| 4 (a) | Description/Definition of salt Hydrolysis by explaining the type of cations and anions that undergo Hydrolysis with the help of four types of salts. | Writing correct statement/description of salt hydrolysis (1) | Partially correct information (0.5) | Wrong answer (0) |  |  |  |  |
|  |  | Writing correct description of cation and anion (2) | Correct description of cation OR anion (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct description of four types of salts with one example of each (strong acid, strong base, weak acid, weak base) (4) | Writing correct description of any three types of salts with one example of each (3) | Correct description of any two types of salts with one example of each (2) | Correct description of any one type of salt with one example (1) | Some relevant information (0.5) | Wrong answer (0) |  |
| 4 (b) | Description of collision theory with reference to energy of activation, formation of activated complex and heat of reactions. | Writing correct statement/description of collision theory (1) | Partially correct response (0.5) | Wrong answer(0) |  |  |  |  |
|  |  | Writing correct description of energy of activation (2) | Partially correct response (1) | Some relevant information (0.5) | Wrong answer(0) |  |  |  |
|  |  | Writing correct formation of activated complex (2) | Partially correct response (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |

| Q.\# /Part \# | Criteria | Level 1 (Marks) | Level 2(Marks) | Level 3 (Marks) | Level 4 (Marks) | Level 5 <br> (Marks) | Level 6 <br> (Marks) | Level 7 <br> (Marks) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Writing correct description/Drawing potential energy diagram of heat of reactions ( $\Delta \mathrm{H}$ for exo and endothermic reactions) <br> (1) | Partially correct response (0.5) | Wrong answer (0) |  |  |  |  |
| 5 (a) | State and explanation of Dalton's law and its derivation for the relationship between <br> I. Partial pressure and number of mole <br> II. Partial pressure and mole fraction | Writing correct statement (1) | Partially correct statement (0.5) | Wrong answer (0) |  |  |  |  |
|  |  | Writing correct explanation (2) | Partially Correct explanation (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct derivation of relationship between Partial pressure and number of mole (2) | Partially Correct derivation of Partial pressure and number of mole (1) | Some relevant steps (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct derivation of relationship Partial pressure and mole fraction (2) | Partially Correct derivation of Partial pressure and mole fraction (1) | Some relevant steps (0.5) | Wrong answer (0) |  |  |  |
| 5 (b) | Describing the fact of stated change on the reaction at the equilibrium position <br> I. Decreasing the volume <br> II. Increasing temperature <br> III. Adding $\mathrm{I}_{2}$ | Writing correct description of decreasing the volume (2) | Partially correct description of decreasing the volume (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct description of Increasing temperature (2) | Partially Correct description of Increasing temperature <br> (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |
|  |  | Writing correct description of Adding $\mathrm{I}_{2}$ <br> (2) | Partially Correct description of Adding $\mathrm{I}_{2}$ <br> (1) | Some relevant information (0.5) | Wrong answer (0) |  |  |  |

Note: All the markers must know the solutions of all the question items of the question paper before starting marking.
