FINAL RUBRICS: HSSC 1st ANNUAL EXAMINATION 2023
SUBJECT: PHYSICS HSSC-I (Local)

| Q.\# /Part \# | Criteria | Level 1 (Marks) | Level 2(Marks) | Level 3 (Marks) | Level 4 (Marks) | Level 5 (Marks) | Level 6 (Marks) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2(i) | Differentiate between precision and accuracy | Any three correct differences (03) | Any two correct differences (02) | Any one correct difference (01) | Wrong answer (0) |  |  |
| 2(ii) | Explanation of lifting heavy loads by crane without toppling | Correct reasoning including <br> - Large base area <br> - Low centre of gravity <br> - Line of action of weight passes through base or any other correct complete reason (03) | Any two correct points (02) | Any one correct point OR some relevant information (01) | Wrong answer (0) |  |  |
| 2(iii) | Checking dimensional correctness of equation $\mathrm{E}=\mathrm{hf}$ | Correct proof (03) | Partially correct proof (02) | Some relevant steps (01) | Wrong answer (0) |  |  |
| 2(iv) | Co-relating of Newton's third law and conservation of momentum with example | Correctly relating Newton's third law and conservation of momentum with the help of example like of rocket motion, water sprinkle etc. (03) | Partially correct explanation of example OR stating both laws (02) | Stating any one law OR any relevant correct information of example information (01) | Wrong answer (0) |  |  |
| 2(v) | Definition of impulsive force | Correct definition (01) | Partially correct definition (0.5) | Wrong answer (0) |  |  |  |
|  | Effect of increase of collision time on impulsive force | Correctly relating force and time (01) | Partially correct (0.5) | Wrong answer (0) |  |  |  |
|  | Example | Relevant correct example with short explanation (01) | Partially correct (0.5) | Wrong answer (0) |  |  |  |
| 2(vi) | Mathematical expression for horizontal component of velocity and vertical component of velocity of projectile | Writing Both correct equations of velocities (01) | Any one correct equation (0.5) | Wrong answer (0) |  |  |  |
|  | Effect of gravity on these velocity components | Correct explanation of both components of velocity (02) | Correct explanation of any one components of velocity (01) | Some relevant information (0.5) | Wrong answer (0) |  |  |

| 2(vii) | Description of work done equal to area under force and displacement graph | Correct proof with labeled force (constant OR variable) displacement graph (03) | Partially correct (02) | Some relevant information e.g labeled diagram or one relevant mathematical step (01) | Wrong answer (0) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2(viii) | Definition of escape velocity | Correct definition (01) | Partially correct (0.5) | Wrong answer (0) |  |  |  |
|  | Proof of escape velocity formula | Correct proof (02) | Partially correct with at least two correct mathematical steps (01) | Any correct step (0.5) | Wrong answer (0) |  |  |
| 2 (ix) | Explaining the need of riffling of rifle barrel by using law of conservation of angular momentum | Correct reasoning (03) | Partially correct reasoning (02) | Some relevant information (01) | Wrong answer (0) |  |  |
| 2(x) | (a) Moment of inertia (explanation) | Correct explanation OR definition of moment of inertia and formula (1.5) | Partially correct explanation (01) | Some relevant information (0.5) | Wrong answer (0) |  |  |
|  | (b) Angular momentum (explanation) | Correct explanation OR definition of angular momentum and formula (1.5) | Partially correct explanation (01) | Some relevant information (0.5) | Wrong answer (0) |  |  |
| 2(xi) | Attaining earlier terminal velocity by heavier or lighter object | Correct reasoning (03) | Partially correct (02) | Some relevant information (01) | Wrong answer (0) |  |  |
| 2(xii) | Calculation of one reaction force | Correct calculation (1.5) | Partially correct response <br> (01) | Some relevant information/steps (0.5) | Wrong answer (0) |  |  |
|  | Calculation of second reaction force | Correct calculation (1.5) | Partially correct response <br> (01) | Some relevant information/steps (0.5) | Wrong answer (0) |  |  |
| 2(xiii) | Derivation of frequency of orbiting satellites to produced artificial gravity | Correct derivation of frequency of orbiting satellites to produced artificial gravity (03) | Partially correct with at least three mathematical steps (02) | At least two correct mathematical step (01) | Some relevant information (0.5) | Wrong answer (0) |  |
| 2(xiv) | Frequency of simple pendulum | Correct calculation with answer and unit (03) | Partially correct (02) | Some relevant information (01) | Wrong answer (0) |  |  |
| 2(xv) | Difference between progressive waves and stationary waves | Any two correct differences (02) | Any one correct difference (01) | Some relevant information (0.5) | Wrong answer (0) |  |  |
|  | Examples of progressive waves and stationary waves | Two correct examples of each wave (01) | One correct example (0.5) | Wrong answer (0) |  |  |  |

| 2 (xvi) | Discussion of first mode of <br> vibration in stretched <br> string | Correct description (01) | Partially correct (0.5) | Wrong answer (0) |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | Derivation of frequency of <br> first mode of vibration | Correct derivation of frequency of <br> first mode of vibration with figure <br> (02) | Partially correct (01) | Some relevant <br> steps (0.5) | Wrong answer (0) |
| 2(xvii) | Path difference with <br> reference to interference <br> of two waves | Correct explanation e.g. <br> Definition of path difference w.r.t. <br> concept of interference of two <br> waves with correct/ suitable <br> figures OR Discussing conditions <br> for maxima and minima in term of <br> path difference or any other <br> correct explanation (03) | Partially correct explanation <br> $(02)$ | Some relevant <br> information (01) | Wrong answer (0) |

|  | molar specific heats at constant pressure and at constant volume |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Molar specific heat at constant pressure is greater than molar specific heat at constant volume | Correct reason (02) | Partially correct (01) | Some relevant information (0.5) | Wrong answer (0) |  |  |
|  | Proof of $C_{p}-C_{p}=R$ | Correct proof involving calculation internal energy, first law of thermodynamics, general gas equation etc. (04) | Partially correct with at least two correct calculations mentioned in level 1 (03) | One correct calculation mentioned in level $1(02)$ | Some relevant information (01) | Wrong answer (0) |  |
|  | Description of S.H.M. | Correct description (01) | Partially correct (0.5) | Wrong answer (0) |  |  |  |
| 4(a) | Prove that projection of a body moving in a circular path executes S.H.M | Correct proof of that projection of a body moving in a circular path executes S.H.M with figure (04) | Correct proof of that projection of a body moving in a circular path executes S.H.M without figure (03) | Partially correct with at least three correct mathematical steps (02) | At least two correct mathematical steps OR correct figure (01) | Wrong answer (0) |  |
|  | Derivation of time period | Correct derivation of time period (01) | Partially correct (0.5) | Wrong answer (0) |  |  |  |
|  | Derivation of frequency | Correct derivation of frequency (01) | Partially correct (0.5) | Wrong answer (0) |  |  |  |
|  | Effect on the apparent pitch heard by the observer when both source of sound and observer moving towards each other | Correct description with all the correct mathematical steps and correct result of apparent pitch (03) | Satisfying at least two points mentioned in level 1 (02) | Satisfying at least two points mentioned in level 1 (01) | Wrong answer (0) |  |  |
| 4 (b) | Effect on the apparent pitch heard by the observer when both source of sound and observer moving away each other | Correct description with all the correct mathematical steps and correct result of apparent pitch (03) | Satisfying at least two points mentioned in level 1 (02) | Satisfying at least two points mentioned in level 1 (01) | Wrong answer (0) |  |  |
| 5 (a) | Statement of Bernoulli's equation | Correct statement (01) | Partially correct (0.5) | Wrong answer (0) |  |  |  |

|  | Derivation of Bernoulli's equation | Correct derivation with figure (05) | Correct derivation without figure (04) | Half correct derivation e.g. deriving equation for work done on the fluid (03) | Some relevant steps <br> (02) | Correct labeled figure (01) | Wrong answer (0) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Application of Bernoulli's equation | Correct explanation or derivation of any one application (02) | Partially correct (01) | Some relevant mathematical steps OR information (0.5) | Wrong answer (0) |  |  |
| 5 (b) | Calculation of magnitude of resultant for angle $0^{\circ}$ | Correct calculation with correct answer and unit (2.5) | Partially correct calculation (02) | Some relevant steps (01) | Wrong answer (0) |  |  |
|  | Calculation of magnitude of resultant for angle $120^{\circ}$ | Correct calculation with correct answer and unit (2.5) | Partially correct calculation (02) | Some relevant steps (01) | Wrong answer (0) |  |  |

Note: All the markers must know the solutions of all the question items of the question paper before starting marking.
