## Message from the Chairman FBISE

As Chairman of the Federal Board of Intermediate and Secondary Education (FBISE), I am privileged to steer an institution that is fundamentally impacting the educational landscape. We at FBISE, are tasked with creating an environment of academic excellence, supported by a curriculum that integrates modern pedagogical techniques and instils a sense of national responsibility in our students. Our role in conducting comprehensive examinations at the secondary and higher secondary levels ensures a system that champions fairness and objectivity.

Our initiatives extend to conducting pertinent research to stay abreast of current educational trends and challenges, enabling us to adapt and improve our teaching methodologies. Beyond the conventional roles of an educational board, FBISE offers guidance and support to students, teachers, and other stakeholders. We provide a range of services to our affiliated institutions, such as student enrolment, provision of teaching resources, and teacher training programs. I extend my heartfelt gratitude to all our stakeholders for their continued trust and support. While we acknowledge the significant challenges before us, together, we are committed to striving for academic excellence and nurturing a generation ready and able to shape the future.

## Chapter 1 Executive Summary

The main objective of the task was to assess students' performance through statistical as well as psychometric analysis of examination data of grade 9 of the year 2022. It was further aimed to communicate all stakeholders about gender wise, ability wise, location wise etc. students' performance.

The item-wise students' responses were analysed through Item Response Theory based software named as Xcalibre. This software rates each item on the bases of quality of item rather than number of correct responses having equal weightage.

The item-wise students' responses were analysed through statistics by using SPSS and Microsoft Excel. This analysis was based on number of students' correct response and each correct response carries equal weightage.

Boys from Cadet Colleges outperformed than both boys and girls from all other directorates. The competition of boys and girls from all directorates, except Cadet Colleges, is mixed.

## English Findings:

In English, girls outperformed boys in all directorates except K.R.L E/D. Female students had a better overall ability score than male students in local versions and equal scores in hard versions, with both genders having an average ability score of around 50 . The highest ability score was found in students from Garrison and AJK, while the lowest was found in students from FDE and Federal provinces. South Waziristan district had the highest ability score among all directorates, while Tharparkar district had the lowest. Almost resembling findings are in other subjects, however detailed remarks are given with each table.

## Mathematics Findings:

The analysis of mathematics (Local \& Hard) suggests that female students have higher ability scores than male students on both local and hard versions of the test, with an average score of about $50 \%$. It also observed that AJK has the best provincial score (55.5\%), followed by Punjab (54.9\%) and Sindh (54\%). The lowest provincial score belongs to overseas students (47.7\%). It is further observed that Cadet Colleges Directorate has the best directorate score (58.92\%), followed by Federal Directorate (57.67\%) and Gilgit Baltistan Directorate (56.77\%). The lowest directorate score belongs to Chilas Directorate (43.62\%). Finally, Dera

Bughti district has the best district score (65.17\%), followed by Islamabad Capital Territory district (63\%) and Khushab district (62\%). The lowest district score belongs to Khairpur district (35.67\%).

## Biology Findings:

The results for Biology also show similar results on both local and hard version of papers. The major findings are as follows:

- Female students performed better than male students.
- Students from AJK have the highest ability scores, while those from Sindh have the lowest.
- Students from the Garrison directorate have the best performance, while those from Chilas directorate have the worst. Finally, the results suggest that except for the Garrison directorate, female students performed better than male students.

## Chemistry Findings:

- Overall ability score of female students is comparatively better than male students on both local and hard versions.
- The ability score of both male and female students is about 50\%.
- Students of AJK (55.86\%) are best and Federal (48.04\%) is least among all provinces.
- The ability score of students of Garrison (58.89\%) is best and FDE (42.21\%) is least among all directorates.
- Above table explored that ability score of students of South Waziristan district (63.28\%) is best and Larkana district (24.42\%) is least among all directorates.

## Physics Findings:

- Overall ability score of female students is comparatively better than male students on both local and hard versions.
- The ability score of both male and female students is about $50 \%$.
- Ability scores of students of AJK (57.06\%) is best and Federal (47.67\%) is least among all provinces.
- Scores of students of Gawader district (62.72\%) are best and Khairpur district (28.49\%) is least among all directorates.

## Chapter 2 Introduction

### 2.1 Background

The Federal Board of Intermediate and Secondary Education is an independent body established by the Government of Pakistan to evaluate and assess the academic progress of students. The board develops assessment materials that are used to measure students' learning outcomes and provide feedback to policymakers and other stakeholders. An important aspect of this process is the use of psychometric analysis to develop benchmarks for evaluating students' performance, which involves scaling the results.

### 2.2 Psychometric Analysis for Quality Assessment

Ensuring the provision of quality education to all children is crucial for a nation's success in the modern world. An effective and transparent assessment system is essential to ensure the quality of education. The Federal Board of Intermediate and Secondary Education (FBISE) in Islamabad is working tirelessly to improve the assessment system by implementing necessary reforms that will benefit the public. The key component of quality education is high-quality assessment, and the Federal Board of Examinations has taken the initiative to standardize its assessment development process. As a part of this effort, the board has outsourced the analysis of its items to understand their psychometric properties. FBISE has also started online onscreen marking and has digital data of grade 9 in subjects such as English, Mathematics, Physics, Chemistry, and Biology.

Assessments use an individual's responses to its items to make inferences about their level of attainment in a given area, typically by generating a score reflecting the level of achievement. As the quality of assessment scores, namely their reliability and validity, is primarily determined by the quality of the assessment items, it is essential to assess the properties of the items making up the assessment. Good items result in high-quality scores, while bad items result in low-quality scores. But how can we determine whether a particular item is good or bad? The process of item analysis aims to evaluate the properties of items to determine (a) which items make an acceptable contribution to the quality of the generated scores and (b) which items require revision or removal from the assessment altogether. This process ensures
the continued improvement of assessment quality by maintaining the relevance and accuracy of its items.

### 2.3 Objective of the Task

The main objective of the task was to assess students' performance through statistical as well as psychometric analysis of examination data of grade 9 of the year 2022. It was further aimed to communicate all stakeholders about gender wise, ability wise, location wise etc. students' performance.

### 2.4 Conceptual Understanding of Task

Psychometric testing is designed to gain a better understanding of an individual's cognitive capacity, the natural ability within areas, interests, and personality traits. A psychometric analysis is widely used in the realm of testing to develop benchmarks for comparison of students' performance over the years as well as different curricula through alignment of common students' learning outcomes.

### 2.5 Psychometric Analysis of Examination Data

The item-wise students' responses were analysed through Item Response Theory based software named as Xcalibre. This software rates each item on the bases of quality of item rather than number of correct responses having equal weightage.

### 2.6 Statistical Analysis of Examination Data

The item-wise students' responses were analysed through statistics by using SPSS and Microsoft Excel. This analysis was based on number of students' correct response and each correct response carries equal weightage.

## Chapter 3 Performance Analysis

IRT is being used to predict students' scores based on his/her abilities or latent traits and to establish a relationship between person's item performance and the set of traits underling item performance. IRT provides a precise estimate of students' location on the underlying distribution of ability, analogous to the standard z scale. Usually, a scale 0 to 1000 is used to report a student's ability in IRT models. In Pakistani scenario, a scale 0 to 100 is used to report students' ability score based on psychometric analysis.

### 3.1 Ability Scores

In IRT, each item on a test is calibrated to determine its difficulty level and how well it discriminates between students with different levels of ability. Based on a student's responses to the items on the test, a statistical model is used to estimate their ability level, which is represented as a numerical score on a continuous scale.

The ability score is typically expressed in the same units as the item difficulty parameters, which are usually expressed on a logit scale. A higher ability score indicates a higher level of proficiency or knowledge in the subject area being assessed.

The use of IRT allows for a more precise and accurate estimation of a student's ability level, as well as the difficulty level of each test item, which can be used to guide instructional decisions and evaluate the effectiveness of educational programs.

### 3.2 Comparison of Students Performance by Ability Scores English

## Table 1 Gender Wise Comparison (English)

| Type of Paper <br> (Local/Hard) | Gender | Overall Ability <br> Score | MCQs Ability <br> Score | CRQs Ability <br> Score |
| :---: | :--- | :---: | :---: | :---: |
| Hard | Female | 50.08 | 49.23 | 50.93 |
|  | Male | 50.16 | 51.52 | 49.47 |
|  | Total | 50.12 | 50.48 | 50.13 |
|  | Female | 51.38 | 50.56 | 51.72 |
|  | Male | 48.73 | 50.06 | 48.40 |
|  | Total | 50.03 | 50.31 | 50.02 |
| Total | Female | 51.17 | 50.34 | 51.59 |
|  | Male | 48.99 | 50.33 | 48.60 |
|  | Total | 50.04 | 50.34 | 50.04 |

Above table explored that overall ability score of female students is comparatively better than male students on local version and equal on hard versions. The ability score of both male and female students is about $50 \%$.
Figure 1 Overall ability scores English

Table $2 \quad$ Province Wise Comparison (English)

| Province | Overall <br> Ability Score | MCQs <br> Ability Score | CRQs <br> Ability Score |
| :--- | :---: | :---: | :---: |
| A.J.K. | 59.20 | 55.35 | 60.41 |
| BALUCHISTAN | 50.79 | 52.17 | 50.01 |
| FEDERAL | 47.01 | 47.67 | 47.39 |
| GILGIT-BALTISTAN | 48.35 | 49.37 | 48.29 |
| KHYBER-PUKHTUNKHWA | 55.16 | 55.81 | 53.67 |
| OVERSEAS | 54.44 | 52.76 | 54.95 |
| PUNJAB | 51.59 | 51.27 | 51.64 |
| SINDH | 49.62 | 51.23 | 48.87 |
| Total | 50.04 | 50.34 | 50.04 |

Above table explored that ability score of students of AJK (59.20\%) is best and Federal (47.01\%) is least among all provinces.

## Table 3 Directorate Wise Comparison (English)

| Directorate | Overall <br> Ability <br> Score | MCQs <br> Ability <br> Score | CRQs <br> Ability <br> Score |
| :--- | :---: | :---: | :---: |
| BAHRIA FDN.E/D | 55.29 | 53.90 | 55.28 |
| CADET COLLEGES | 59.65 | 59.55 | 57.46 |
| CANTT BOARD | 53.25 | 53.04 | 52.88 |
| CHILAS DIRECTORATE | 46.27 | 51.82 | 44.55 |
| F.G.E.I (C \& G) | 50.04 | 49.85 | 50.29 |
| FAUJI FDN, E/D | 57.01 | 56.09 | 56.29 |
| FDE | 44.57 | 45.39 | 45.31 |
| FRONTIER CORPS | 52.91 | 51.92 | 52.79 |
| GARRISION | 61.08 | 59.07 | 60.05 |

### 3.4 Comparison of Students Performance by Ability Scores Biology

Table 17 Gender Wise Comparison (Biology)

| Local/Hard | gender | Overall Ability <br> Score | MCQs Ability <br> Score | CRQs Ability <br> Score |
| :---: | :--- | :---: | :---: | :---: |
|  | Female | 51.25 | 49.90 | 52.07 |
|  | Male | 49.31 | 50.92 | 48.60 |
|  | Total | 50.15 | 50.48 | 50.11 |
| Local | Female | 50.97 | 50.44 | 51.33 |
|  | Male | 48.75 | 50.57 | 48.16 |
|  | Total | 50.07 | 50.49 | 50.05 |
| Total | Female | 51.01 | 50.35 | 51.45 |
|  | Male | 48.90 | 50.66 | 48.28 |
|  | Total | 50.09 | 50.49 | 50.06 |

Above table explored that overall ability score of female students is comparatively better than male students on both local and hard versions. The ability score of both male and female students is about $50 \%$.

Figure 3 Overall ability scores Biology

Table 18 Province Wise Comparison (Biology)

| Province | Overall <br> Ability Score | MCQs <br> Ability Score | CRQs <br> Ability Score |
| :--- | :--- | :--- | :--- |
| A.J.K. | 57.52 | 55.18 | 57.65 |
| BALUCHISTAN | 47.94 | 49.06 | 47.84 |
| FEDERAL | 47.57 | 48.79 | 47.61 |

### 3.5 Comparison of Students Performance by Ability Scores Chemistry

Table 25 Gender Wise Comparison (Chemistry)

| Local/ <br> Hard | Gender | Overall Ability Score | MCQs Ability Score | CRQs Ability Score |
| :--- | :--- | :---: | :---: | :---: |
|  | Female | 51.22 | 49.97 | 51.79 |
|  | Male | 49.36 | 50.95 | 48.98 |
|  | Total | 50.10 | 50.56 | 50.09 |
| Local | Female | 52.38 | 50.32 | 52.89 |
|  | Male | 48.43 | 49.97 | 48.18 |
|  | Total | 50.23 | 50.13 | 50.32 |
|  | Female | 52.21 | 50.27 | 52.73 |
|  | Male | 48.59 | 50.14 | 48.32 |
|  | Total | 50.20 | 50.20 | 50.29 |

Above table explored that overall ability score of female students is comparatively better than male students on both local and hard versions. The ability score of both male and female students is about $50 \%$.

Figure $4 \quad$ Overall ability scores Chemistry

## Table 26 Province Wise Comparison (Chemistry)

| Province | Overall <br> Ability Score | MCQs <br> Ability Score | CRQs <br> Ability Score |
| :--- | :---: | :---: | :---: |
| A.J.K. | 55.86 | 53.02 | 56.53 |
| BALUCHISTAN | 49.30 | 51.66 | 48.49 |
| FEDERAL | 48.04 | 48.53 | 48.31 |
| GILGIT-BALTISTAN | 48.51 | 49.55 | 48.52 |
| KHYBER-PUKHTUNKHWA | 54.17 | 55.70 | 52.79 |
| OVERSEAS | 50.08 | 51.40 | 49.69 |
| PUNJAB | 49.01 | 48.35 | 49.57 |
| SINDH | 50.20 | 50.20 | 50.29 |
| Total | 50.71 | 51.44 |  |

Above table explored that ability score of students of AJK (55.86\%) is best and Federal (48.04\%) is least among all provinces.

Table 27 Directorate Wise Comparison (Chemistry)

| Directorate | Overall <br> Ability <br> Score | MCQs <br> Ability <br> Score | CRQs <br> Ability <br> Score |
| :--- | :---: | :---: | :---: |

|  | Male | 48.59 | 49.86 | 48.44 |
|  | Total | 50.12 | 50.24 | 50.15 |

Above table explored that overall ability score of female students is comparatively better than male students on both local and hard versions. The ability score of both male and female students is about $50 \%$.

Figure 5 Overall ability scores Physics

Table 34 Province Wise Comparison (Physics)

| Province | Overall <br> Ability Score | MCQs <br> Ability Score | CRQs <br> Ability Score |
| :--- | :---: | :---: | :---: |
| A.J.K. | 57.06 | 54.43 | 57.51 |
| BALUCHISTAN | 49.49 | 50.80 | 49.20 |
| FEDERAL | 47.67 | 48.75 | 47.71 |
| GILGIT-BALTISTAN | 48.62 | 49.45 | 48.62 |
| KHYBER-PUKHTUNKHWA | 52.72 | 53.65 | 51.99 |
| OVERSEAS | 48.82 | 48.59 | 49.05 |
| PUNJAB | 51.65 | 51.02 | 51.72 |
| SINDH | 50.12 | 50.24 | 50.15 |
| Total |  | 48.43 | 48.74 |

Above table explored that ability score of students of AJK (57.06\%) is best and Federal $(47.67 \%)$ is least among all provinces.

Table 35 Directorate Wise Comparison (Physics)

| Directorate | Overall <br> Ability <br> Score | MCQs <br> Ability <br> Score | CRQs <br> Ability <br> Score |
| :--- | :---: | :---: | :---: |
| BAHRIA FDN.E/D | 54.02 | 52.25 | 54.15 |
| CADET COLLEGES | 56.92 | 59.12 | 55.10 |
| CANTT BOARD | 51.94 | 51.24 | 52.09 |
| CHILAS DIRECTORATE | 40.90 | 46.36 | 40.72 |

Following table explored Percentage of students who correctly solved, remembering, understanding and applying level items.

Table 41 Overall performance of students as per cognitive levels

| Subject/ <br> Version |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| English | 61.2 | 56.5 | 0.0 | 66.9 | 48.8 | 60.9 |
| Physics | 58.9 | 57.0 | 62.0 | 49.3 | 45.1 | 25.3 |
| Chemistry | 67.9 | 57.7 | 96.9 | 37.0 | 49.0 | 41.0 |
| Biology | 66.8 | 59.1 | 0.0 | 43.7 | 36.2 | 0.0 |
| Math | 56.9 | 47.3 | 0.0 | 0.0 | 35.3 | 26.6 |

In Physics and Chemistry only one analyzing level MCQ was in the paper. So their result may not illustrate true picture as they contain $25 \%$ guessing chance or some expert may not rate them as analyzing level items.

## Chapter 4 Student Performance as per Trends in International Mathematics and Science Studies (TIMSS) Scale

The TIMSS-2019 Scale grade 8 (Science and Math) is used to report students' performance. Its ability scale 0-1000 based on IRT. The Students International Benchmarks are used to bifurcate students' performance as below. TIMSS uses five international benchmarks to scale the scores: Advanced, High, Intermediate, Low and Not Achieved. TIMSS uses to describe achievement at four points along the scale: Advanced (625 or higher), High (550 or higher), Intermediate (475 or higher), and Low (400 or higher)1. These benchmarks are based on what students know and can do at each level.

Table 42 Students Performance Level in English in Terms of TIMSS

| Students Performance Level in English |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Paper Type | Gender | International Benchmark | Frequency | Percent |
| Hard | Female | Low | 1210 | 14.2 |
|  |  | Intermediate | 2302 | 27.1 |
|  |  | High | 2517 | 29.6 |
|  |  | Advanced | 2470 | 29.1 |
|  |  | Total | 8499 | 100 |
|  | Male | Low | 1527 | 14.9 |
|  |  | Intermediate | 2561 | 25 |
|  |  | High | 2993 | 29.2 |
|  |  | Advanced | 3173 | 30.9 |
|  |  | Total | 10254 | 100 |
| Local | Female | Low | 5202 | 11.8 |
|  |  | Intermediate | 10506 | 23.9 |
|  |  | High | 12506 | 28.4 |
|  |  | Advanced | 15766 | 35.8 |
|  |  | Total | 43980 | 100 |
|  | Male | Low | 9154 | 19.9 |
|  |  | Intermediate | 11522 | 25 |
|  |  | High | 12558 | 27.3 |
|  |  | Advanced | 12800 | 27.8 |
|  |  | Total | 46034 | 100 |

On the bases on "Advance Level" It seems that Girls are outperforming than boys in all local versions of all subjects while hard version of Physics, Chemistry and Biology students only showed a fractional better performance in Mathematics and English.

## Chapter 5 Most Left over Questions

Following table shows most left over (Attempted 0-30\%) questions in section A, B and C . The items also explored the difficult content/topics based on students' responses.

## Table 48 Left over questions

| Least favourable Questions Attempted by (0-30)\% students | Mathematics |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

1. Most left over question were opted and responded correctly by only 0 to 30 percentage students. It may indicate that these SLOs aligned with these questions are difficult to understand. Teachers may be more focused on these SLOs during teaching-learning process. Teachers may be also revised corresponding SLOs of Grade 8 during teaching these difficult SLOs of Grade 9 so that students be able to understand underlying concept of these SLOs.
2. Comparison of ability scores explored students' from a few directorates need more attention to improve their performance.
3. Girls are performing better than boys, so teachers of boys' institutions may guide their students to prepare themselves for final exams.
4. Teachers' training on "Understanding Bloom's Taxonomy" may make them able to understand demand of curriculum and then improving their teaching.

## Chapter 6 Way Forward/Recommendations

1. Based on the analysis of the "Advance Level" exam results, it is recommended that further investigation be conducted to determine the reasons for the gender gap in academic performance. This investigation should include a review of the teaching methods and curriculum used in schools, as well as any potential social or cultural factors that may be contributing to the disparity.
2. Additionally, it is recommended that educators and policymakers consider implementing strategies to support and encourage boys' academic achievement in all subjects, particularly in Mathematics and English. This could include targeted interventions, such as tutoring or mentoring programs, that are designed to address specific areas of difficulty for boys.
3. Furthermore, it is suggested that the exam boards and schools use this data to inform their practices and policies, particularly in relation to gender equality in education. This could involve promoting equal opportunities for all students, regardless of gender, and ensuring that all students have access to the resources and support they need to succeed academically.
4. Based on the finding that some students from a few directorates require more attention to improve their performance, it is recommended that targeted interventions be implemented to support these students. This could include individualized support, such as tutoring or mentoring programs, that are designed to address specific areas of difficulty for these students.
5. Furthermore, it is recommended that the relevant directorates, schools, and educators use this data to inform their practices and policies, particularly in relation to identifying and supporting struggling students. This could involve promoting equal opportunities for all students and ensuring that all students have access to the resources and support they need to succeed academically.
6. It is also recommended that further research be conducted to explore the reasons behind the differences in ability scores among students from different directorates. This could include investigating the impact of curriculum differences or teaching methods on student performance and identifying any
areas where improvements could be made to support students in achieving their full potential.
7. Finally, it is recommended that regular monitoring and evaluation of students' progress be conducted to identify any areas where additional support may be required. This could involve ongoing assessments and feedback, as well as the development of targeted support programs that are designed to meet the specific needs of individual students.
8. Based on the finding that teachers' training on "Understanding Bloom's Taxonomy" may make them able to understand the demand of the curriculum and improve their teaching, it is recommended that such training programs be implemented for teachers. This could include professional development workshops or training sessions that focus on developing a deeper understanding of Bloom's Taxonomy and its application in the classroom.
9. Furthermore, it is recommended that the curriculum be reviewed and revised to incorporate Bloom's Taxonomy as a guiding framework for instructional design and assessment. This could involve aligning learning objectives, instructional strategies, and assessment methods with the different levels of Bloom's Taxonomy to ensure that students are challenged appropriately and are developing higher-order thinking skills.
10.It is also recommended that schools and education policymakers provide ongoing support and resources for teachers to integrate Bloom's Taxonomy into their teaching practices. This could include providing access to teaching materials and resources, as well as opportunities for collaboration and professional learning communities where teachers can share their experiences and best practices.
10. The majority of leftover questions were answered correctly by only 0 to 30 percent of students. This suggests that the corresponding Student Learning Outcomes (SLOs) may be difficult to understand. It is recommended that teachers focus more on these challenging SLOs during the teaching and learning process. Additionally, teachers should consider revising the corresponding SLOs for Grade 8 when teaching these difficult SLOs in Grade 9 to ensure that students can grasp the underlying concepts of these SLOs.
11. Based on the finding that only one analyzing level MCQ was included in the Physics and Chemistry exams, it is recommended that the exams be
reviewed and revised to include a greater number of analyzing level MCQs. This will help ensure that the exams accurately reflect students' abilities and provide a more reliable measure of their understanding of the subject matter.
12. Furthermore, it is recommended that expert reviewers be involved in the development and review of MCQs to ensure that they are appropriately classified based on their level of difficulty and cognitive demand. This could involve engaging subject matter experts or experienced educators in the development of MCQs and involving them in the review process to ensure that the items are appropriately classified and rated.
