Answer Sheet No. _____

Sign. of Candidate _____

Sign. of Invigilator _____

COMPUTER SCIENCE SSC–II (2nd Set)
SECTION – A (Marks 12)
Time allowed: 15 Minutes

Section – A is compulsory. All parts of this section are to be answered on this page and handed over to the Centre Superintendent. Deleting/overwriting is not allowed. **Do not use lead pencil.**

Q.1 Fill the relevant bubble for each part. Each part carries one mark.

- (1) Which symbol is used to obtain the total marks from the values given by users, in the flow chart development?

| | |
|------------------------------------|--|
| A. Rectangle <input type="radio"/> | B. Parallelogram <input type="radio"/> |
| C. Diamond <input type="radio"/> | D. Oval <input type="radio"/> |

- (2) Which one of the following problem-solving stage refers to dividing the solution into steps and arranging in order to solve the problem?

| | |
|-----------------------------------|------------------------------------|
| A. Planning <input type="radio"/> | B. Analyzing <input type="radio"/> |
| C. Defining <input type="radio"/> | D. Selecting <input type="radio"/> |

- (3) Which of the software examines the values stored in variables and help in finding and removing the errors?

| | |
|---------------------------------|-----------------------------------|
| A. Loader <input type="radio"/> | B. Linker <input type="radio"/> |
| C. Editor <input type="radio"/> | D. Debugger <input type="radio"/> |

- (4) What is the range of numbers that can be stored in a variable of type float?

| | |
|---|---|
| A. $10^{-38} - 10^{38}$ <input type="radio"/> | B. $10^{-308} - 10^{308}$ <input type="radio"/> |
| C. $10^{38} - 10^{38}$ <input type="radio"/> | D. $10^{-38} - 10^{32}$ <input type="radio"/> |

- (5) Which symbol with the variable, refers to the memory location in scanf() function:

| | |
|----------------------------|-----------------------------|
| A. # <input type="radio"/> | B. \$ <input type="radio"/> |
| C. % <input type="radio"/> | D. & <input type="radio"/> |

- (6) What is the value of “z” after evaluating the given expression where a = 5, b = 3?
 $z = b / 2 + b * 4 / b \ \&\& \ b < a + a / 3$

| | |
|----------------------------|----------------------------|
| A. 5 <input type="radio"/> | B. 0 <input type="radio"/> |
| C. 1 <input type="radio"/> | D. 6 <input type="radio"/> |

- (7) What is the value of “z” after evaluating the given expression where x=10, y=3?
 $z = 4 * ++x \ || \ -y < x \% 2 \ \&\& \ x + y$

| | |
|-----------------------------|-----------------------------|
| A. 41 <input type="radio"/> | B. 0 <input type="radio"/> |
| C. 1 <input type="radio"/> | D. 40 <input type="radio"/> |

- (8) What is the output of the following codes where a=1 and b= 5?
- ```

if (a-b<6)
 printf("%d", a);
else
 printf("%d", b);
printf("%d", a+b);

```
- A. 1  B. 5   
C. 15  D. 16
- (9) Which one of the following is a valid statement for “For loop”?
- A. for(;;)  B. for(int I =1; ;)   
C. for(; ;k++)  D. All of these
- (10) Which logic gate is represented by the function  $= (\overline{xy})$ ?
- A. NAND  B. NOR   
C. Exclusive-OR  D. Exclusive-NOR
- (11) A computer that makes the web pages available through the internet is called:
- A. website  B. web-server   
C. web-browser  D. web-link
- (12) Which part of the web address tell the server type of file is being requested?
- A. www  B. http://   
C. .html  D. URL
-

Federal Board SSC-II Examination  
Computer Science Model Question Paper  
(Curriculum 2009)

Time allowed: 2.45 hours

Total Marks: 43

Note: Answer any nine parts from Section 'B' and attempt any two questions from Section 'C' on the separately provided answer book. Write your answers neatly and legibly.

**SECTION – B (Marks 27)**

**Q.2** Attempt any **NINE** parts from the following. All parts carry equal marks. (9 × 3 = 27)

- i. What are the features to select the best solution of a problem? (1+1+1)
- ii. Write an algorithm to find the sum, product and average of five given numbers? (1+1+1)
- iii. Briefly describe the three fundamental element of structured programming in C language? (1+1+1)
- iv. What happens if header-files were not used in C program? List at-least two header-files with their purpose (1+2)
- v. Compare printf() and puts() function with at-least one example. (3)
- vi. Write at-least three differences between format specifiers and escape sequence characters. (3)
- vii. Draw precedence table of operators used in the following expression: (3)  
 $z = !(4*++x-y \parallel x==y/--y < x \% 2 \&\&x++ + y)$
- viii. Differentiate between if-else-if and switch structure. (3)
- ix. Write a code that prints the given sequence of numbers on a single line also print its sum by using any loop. (2+1)  
30 27 24 21 18 15 12 9 6 3 0 -3 -6 -9

x. Write the output of **each gate** shown in the following figure: (3)

- xi. Differentiate between ordered list and unordered list used in HTML. (3)
- xii. Define the following terms: (1+1+1)  
a. Web-Hosting      b. Web-Server      c. Hyper-Link
- xiii. Differentiate between Frame and Frame set by giving one example used in HTML. (3)

**SECTION – C (Marks 16)**

**Note:** Attempt any **TWO** questions. (8 × 2 = 16)

**Q.3** Write a C program to input electricity unit charge and calculate the total electricity bill according to the given condition: (5+3)

For first 50 units Rs. 0.50/unit  
For next 100 units Rs. 0.75/unit

For next 100 units Rs. 1.20/unit  
For unit above 250 Rs. 1.50/unit  
An additional surcharge of 20% is added to the bill.

Also justify your selection of conditional control structure.

- Q.4** Write a program that read a number and prints its power (take it from user) if it is a prime number otherwise print its factorial by using any control structure. (8)
- Q.5**
- a. Briefly describe NOR and Exclusive NOR(XNOR) logic gate with circuit diagram and truth table. (4)
  - b. Define Karnaugh Map(K-Map) also write the simplification rules for three variable Karnaugh Map. (4)
